OUR MISSIONS
With the aging working class and the nature of repetitive and high risk tasks, robot automation is undoubtedly the solution. To accelerate the adaption of robot in various industries, we believe in a universal and intuitive robot control system. User shall not be struggle with the robot control and focus on the applications of robots. We believe only by closing the gap of robot control operation and the industry workflow, a sustainable future is possible.

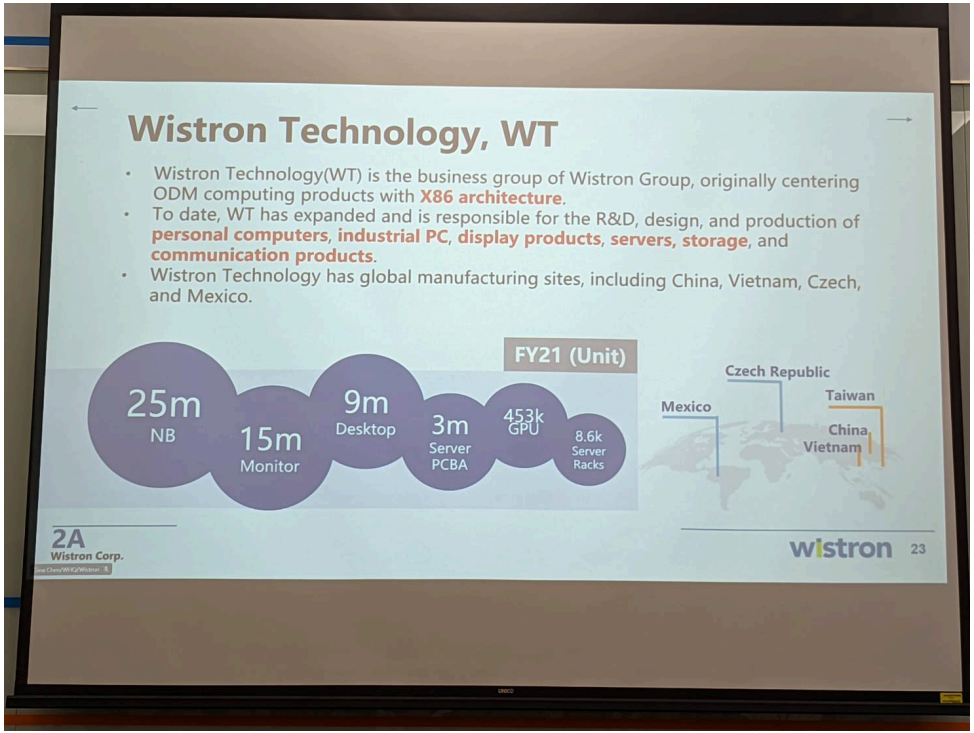
22



Wistron Technology, WT
Wistron Technology(WT) is the business group of Wistron Group, originally centering ODM computing products with X86 architecture.
To date, WT has expanded and is responsible for the R&D, design, and production of personal computers, industrial PC, display products, servers, storage, and communication products.
Wistron Technology has global manufacturing sites, including China, Vietnam, Czech, and Mexico.
